We are getting some spam in the Facebook group - I've removed posts and banned posters so far, and I will look at how we can make the group more secure.
Deployment news (launched, ongoing, new): Mission Control Spreadsheet - from most recent to the oldest project. For missions with more than one CCPM, the lead CCPM will be responsible for updating on that mission. This means that the lead will be responsible for updating the mission under their name and copying and pasting that update to their co-CCPMs and removing the highlight in the mission under their co-lead’s name.

Shoreh

1. **A self-designed project**: Javier Aguilar conducted his first training in February and submitted a report shortly after. The report was included in the newsletter. He plans to conduct additional workshops in April. No update this month.

2. 364 - Audubon Society of Northern Virginia ASNV: Mohammad/Shoreh (Updated Apr 19)
   - Phase 1 of the project which was “updating the older data” has been successfully completed.
   - The PA has learned how to do it by themselves. Sustainable solution has been provided to them.
   - Phase 2 of the project which was “how to benefit more from GIS” is on hold. The PA and their parent body are still unsure how to proceed with this task.
   - Spring is their busy time and the 2nd phase of the project is not on their high priority task list.
   - PA has been notified that the project is scheduled to end on April 24 (started on Jan 24, 2023).

3. 351: MRA-2022: Shoreh
   - Reminded the volunteer to send his report for our May newsletter. He just submitted the report. It’s short and to the point.

4. 346 - INSARAG: Shoreh/Mohammad
   - Last month the volunteer completed the last training for the Republica Dominic’s USAR team. It was the last session for Central America. He’s now awaiting for more instructions from INSARAG.

5. 325 - The Protected Area Management Solution (PAM) Partnership - SAWC Mentorship: Shoreh
   - Paul is back from South Africa and shared five documents (mainly recommendations) with the SAWC team upon return. He said that his trip was very productive and he was able to provide direct technical support, administrative direction for AGO, as well as having discussions and deliverables related to governance. He will write a report for the website soon. Shawn is leaving on April 21st for six days and three of his best students are joining him to help develop a Cartographic Basemap, campus navigation website, emergency management and asset management solutions for SAWC staff, and helping them organize their data for use in the Longitudinal studies. Their main goal aside from helping them with the longitudinal studies, is to work with them on how to best teach AGO in their Diploma program.
   - Will send another update to Isabel and Esri once Paul submits his report.
   - Copy of the executed funding agreement.
   - The latest version of the Charter is posted here.
   - The PAM AGO can be accessed from here.
